The distance between the video screen and the camera is labeled 'C'. The distance between the camera and the target is labeled 'T'. The distance between the camera and the starting point is labeled 'S'.

Figure 1 is a dot plot showing the number of positive results for various pathogens in different fish species. The y-axis lists pathogens: *Aeromonas*, *Aeromonas hydrophila*, *Aeromonas salmonicida*, *Aeromonas caviae*, *Aeromonas sobria*, *Aeromonas hydrophila*, *Aeromonas salmonicida*, *Aeromonas caviae*, *Aeromonas sobria*, *Aeromonas hydrophila*, *Aeromonas salmonicida*, *Aeromonas caviae*, *Aeromonas sobria*. The x-axis lists fish species: Salmon, Trout, Carp, Pike, Eel, Catfish, Tilapia, Goldfish, Koi, Common carp, Rainbow trout, Atlantic salmon, Brown trout, Sea bass, Turbot, Sole, Plaice, Haddock, Cod, Mackerel, Salmon, Trout, Carp, Pike, Eel, Catfish, Tilapia, Goldfish, Koi, Common carp, Rainbow trout, Atlantic salmon, Brown trout, Sea bass, Turbot, Sole, Plaice, Haddock, Cod, Mackerel. The number of positive results is indicated by the number of dots for each pathogen-species combination.

Imports blamed for low buying price of onion

By Antonette Reyes  
PHILADELPHIA

Onion growers in CamSur are protesting the low buying price of their produce.

Onion growers in CamSur are protesting the low buying price of their produce. The growers claim that the price is too low to cover their costs and that they are being exploited by the buyers. They are demanding a higher price for their onions.

The growers are also complaining about the quality of the onions. They say that the onions are small and have a high water content, which makes them less desirable to buyers.

The growers are planning to take legal action against the buyers if their demands are not met. They are also seeking the help of the government to resolve the issue. The government has promised to investigate the matter and to take appropriate action.

# 25 dead in US coal mine explosion

At least 25 people were killed and 100 injured in a massive explosion that ripped through a coal mine in West Virginia on Sunday. The blast, which occurred in the early morning hours, was the deadliest in the history of the state. The mine, known as the No. 29 mine, is one of the largest in the country. The explosion was caused by a combination of factors, including a faulty electrical system and a lack of proper safety measures. The mine was closed immediately after the blast, and the bodies of the victims were recovered over the course of several days. The explosion has raised concerns about the safety of coal mining in the United States.

## Worldwide

### Marijuana is your friend

Medical marijuana is becoming increasingly popular in the United States. Many people are using it to treat a variety of conditions, including chronic pain, nausea, and loss of appetite. The use of medical marijuana is also becoming more widely accepted by doctors and other healthcare professionals. In some states, patients are allowed to grow their own marijuana for medical use. This has led to a significant increase in the number of people using medical marijuana. The use of medical marijuana is also becoming more common in other countries, including Canada and the United Kingdom.

### 18 trapped in mine

Eighteen miners were trapped in a coal mine in West Virginia after a rock fall blocked the main entrance. The miners were rescued after a search and rescue operation that lasted for several days. The rescue operation involved drilling a shaft into the mine and lowering a rescue basket to the trapped miners. The miners were rescued safely and are now recovering from their ordeal. The incident has raised concerns about the safety of coal mining in the United States.

### Gay & lesbian in Georgia

IMF FINANCIAL ASSESSMENT

# RP credited for having strong banks

By Alexander L. Brown

MANILA, Philippines — The International Monetary Fund (IMF) has praised the Philippines for having strong banks, a key factor in its decision to grant the country a \$1.5-billion credit line. The fund's assessment, released last week, noted that the Philippine banking system is "well-capitalized and liquid, and has a strong track record of sound management." The fund also praised the government's efforts to reform the financial sector, including the creation of a new regulatory body, the Securities and Exchange Board, and the implementation of a new banking law. The fund's assessment is a significant endorsement of the Philippine financial system, which has been under scrutiny since the 1993 Asian financial crisis. The fund's decision to grant the credit line is a major step in the Philippines' efforts to attract foreign investment and stimulate economic growth.

## Foreign borrowings

The Philippines' foreign borrowings have increased significantly in recent years, reflecting the country's growing reliance on external financing. The IMF's assessment noted that the Philippines' foreign debt has risen from \$1.5 billion in 1990 to \$10 billion in 1994. 1. *What is the main purpose of the study?*  
 The study aims to investigate the effects of a new teaching method on student performance in mathematics.

2. *What are the research questions?*  
 The research questions are:  
 a) Does the new teaching method improve student performance compared to the traditional method?  
 b) Are there any significant differences in student engagement between the two methods?  
 c) How do students perceive the new teaching method?

3. *What is the significance of the study?*  
 The study is significant as it explores the effectiveness of a novel educational approach, which could potentially enhance learning outcomes and student motivation in mathematics education.

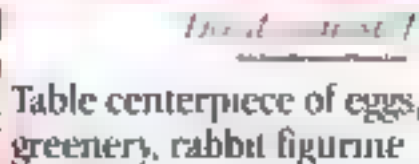

4. *What are the limitations of the study?*  
 The study has several limitations, including a small sample size, a short duration, and the lack of a control group, which may affect the generalizability of the findings.

5. *What are the conclusions?*  
 The study concludes that the new teaching method shows promise in improving student performance and engagement, but further research is needed to confirm these findings and address the limitations.

Figure 1 consists of two line graphs. The left graph is for the 'same' condition and the right graph is for the 'different' condition. Both graphs plot 'Percentage of correct responses' on the y-axis (0 to 100) against 'Age' on the x-axis (5, 6, 7, 8, 9). In the 'same' condition, performance starts at approximately 65% at age 5, rises to 70% at age 6, 75% at age 7, 80% at age 8, and reaches 85% at age 9. In the 'different' condition, performance starts at approximately 60% at age 5, rises to 65% at age 6, 75% at age 7, 80% at age 8, and reaches 85% at age 9. Both conditions show a significant improvement between ages 7 and 8.

# Former child star's addictions crying for intervention

By Dave Karger and Jeff Labrecque

When Maja Marjanovic was 10, she was the first child star to be named "America's Most Promising Young Actress" by *Time* magazine.

Now, at 30, she's a former addict who's been sober for 10 years. She's also a mother of two and a successful actress. But she's still struggling with her past.

## Marjanovic's early years

Marjanovic was born in 1978 in New York City. She was discovered by a talent agent when she was 10. She was in *The Untouchables* and *The Untouchables: The Motion Picture*. She was also in *The Untouchables: The Motion Picture 2*.

## Her addiction

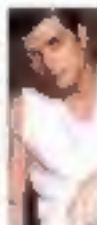

Marjanovic was sober for 10 years. She was in *The Untouchables* and *The Untouchables: The Motion Picture*. She was also in *The Untouchables: The Motion Picture 2*.

## Her recovery

Marjanovic was sober for 10 years. She was in *The Untouchables* and *The Untouchables: The Motion Picture*. She was also in *The Untouchables: The Motion Picture 2*.
